

New system controllers for D4 series (excluding Premium and + versions)

Effective immediately, the controllers for the D4 series of VIQUA UV water disinfection systems (D4, D4-V [650694/6-R, 660039-R], IHS12-D4, and IHS22-D4) **will no longer feature dry contacts** for the switching of external devices, such as a solenoid valve, in the event of lamp failure.

If it's necessary for you to be able to use external devices, the following systems are compatible:

- D4 Premium (660089/90-R)
- D4+, D4-V+ (650695/7-R, 660042-R)
- E4, E4-V, E4+, E4-V+, E4-50+ (650682/718, 660040-R, 650683/719, 660043-R, 650638/9-R), IHS22-E4
- F4, F4-V, F4+, F4-V+, F4-50+ (650686/720, 660041-R, 650687/721, 660044-R, 650640/1-R)

Replacement D4-series controllers featuring dry contacts (p/n 650713-007) will continue to be available until January 1, 2017. After that point, you have the option of upgrading to the new LCD controller (p/n 650733-R), which does have the dry contacts feature.

These new controllers will also feature the **new optimized locking connector** that began shipping last month. Features of the new connector include:

- A robust mechanical lock ensures full engagement of the connector to the lamp.
- Fully integrated into the existing connector design to ensure no parts become loose or lost.
- Fewer assembly steps than the previous connector (no separate 'dust cap').
