

AF SERIES

CARBON

KEY FEATURES

- **USES RESINTECH® PREMIUM ACID WASHED CARBON**
- **PROP 65 COMPLIANT FOR DRINKING WATER APPLICATIONS**
- **FITS STANDARD RESIDENTIAL AND INDUSTRIAL HOUSINGS**

CARBON CARTRIDGES

Carbon filtration is an inexpensive and effective way to remove chemicals and contaminants commonly found in tap water. Aries FilterWorks carbon cartridges are an ideal choice for taste and odor control, chlorine removal, and organic reduction. Premium carbons are available in coal or coconut shell and are acid washed for a balanced.

California Prop 65 compliance ensures each lot of media complies with EPA recommended levels of contaminants, including arsenic.

APPLICATIONS

RESIDENTIAL USE -

Carbon cartridges used as part of a water treatment system, improves water quality by removing harmful contaminants from municipal water supplies.

PRE-TREATMENT TO REVERSE OSMOSIS (RO) -

Provides protection by removing contaminants such as chlorine and organics that can foul RO membranes.

POINT-OF-USE (POU) DRINKING WATER SYSTEMS -

Cartridge provides a source of clean water and is more cost effective than purchasing bottled water. It can be used as a standalone filter to reduce or eliminate: bad tastes and odors, chlorine and organic contaminants in municipal water supplies. The use of carbon cartridges significantly improves drinking water quality.

ABOUT CARBON

Activated carbon has remarkable absorptive properties, which makes it effective in removing chlorine, sediment and Volatile Organic Compounds (VOCs). The Carbon particles have a large surface area, allowing a small amount of carbon to efficiently filter large volumes of water. As water passes through the carbon filter many chemicals and contaminants in the water are bonded at a molecular level to the carbon, effectively removing them from the water. A large percentage of chemical compounds and organic contaminants, that cause taste and odor problems are removed by carbon.

FEATURES & BENEFITS

- **USE OF RESINTECH® PREMIUM FINE MESH CARBON STANDARD**
Optimum mesh size provides more surface area to enhance organic adsorption and chlorine conversion
- **AVAILABLE IN ACID WASHED CARBON**
Acid washing reduces carbon fines, prevents pH spiking, improves rinse up time, and adds approximately 5% more capacity to carbon media
- **OVERSIZED CARTRIDGE FOR MAXIMUM MEDIA FILL**
AF Series cartridges have up to 50% higher capacity and extend cartridge life, due to the use of larger cartridges.
- **QUALITY PRODUCED AND MADE IN THE USA**
To ensure consistent quality and peace of mind for the consumer all drinking water media are WQA Gold Seal or NSF certified. Cartridges are produced by Aries FilterWorks, a division of ResinTech®. Strict quality control over all aspects of production allows complete traceability of every cartridge

MEDIA

As a division of ResinTech, Inc.®, Aries FilterWorks is the only integrated water filtration media and cartridge manufacturer providing a premium product at the most competitive cost. Aries builds technology and knowledge of ion exchange and specialty adsorbents into each cartridge. Strict quality control over all aspects of cartridge production allows complete traceability of every filter.

ORDERING GUIDE

PART NUMBER	MEDIA	STANDARD HOUSING DIAMETER x LENGTH	FLOW RATE (GPM)		CAPACITY (GALLONS)
			OPERATING	MAXIMUM	
AF-10-1051	ResinTech® Premium	2.5" x 10"	.75	1.0	4,000
AF-20-1051	AGC40-AW / AGC50-AW	2.5" x 20"	1.0	2.0	9,000
