

Rugged economical plastic distributor heads for single in-out applications.

# 990S/890S/890C/RA201 890 Plastic Distributor Heads

The 990S, 890S, 890C and RA201 890 Distributor Heads are molded of rugged composite plastic. These distribution heads are designed for single in-out applications on filters such as sediment removal, taste, odor, pH neutralization or demineralization.

These economical heads will fit onto standard 2½" - 8 NPSM tank openings. A tapered riser port simplifies installation of riser pipes. Inlet and outlet openings are designed for easy, straight line installation. An additional ¾" or ½" outlet is available on the 890C and RA201 890 for water sampling, conductivity lights or other applications. A complete line of top and bottom distributors and riser pipes is available. Consult factory for additional information.

| ORDER NO. | DESCRIPTION | TANK OPENING SIZE | INLET/OUTLET OPENINGS | SIDE PORT OPENING | RISER PIPE SIZE | O-RING SEAL |
|-----------|-------------|-------------------|-----------------------|-------------------|-----------------|-------------|
| D1226     | 990S        | 2½" - 8 NPSM      | 1" FNPT               | Not Applicable    | 1.050"          | Face Seal   |
| D7171     | 890S        | 2½" - 8 NPSM      | ¾" FNPT               | Not Applicable    | 13/16"          | Face Seal   |
| D7173     | 890C        | 2½" - 8 NPSM      | ¾" FNPT               | ¾" FNPT           | 13/16"          | Face Seal   |
| R7009     | RA201 890   | 2½" - 8 NPSM      | ¾" FNPT               | ½" FNPT           | 13/16"          | Face Seal   |
