The carbon is processed into blocks using a unique binder system and proprietary manufacturing techniques to produce filters with a greater number of micro-pores, which display superior adsorption capacity and kinetic dynamics.

Green Quality

FX™ PB1 carbon block filters are:

- Manufactured in ISO 9001 and 14001 certified facilities.
- Manufactured from NSF Standard 61 certified Coconut Shell Carbon.
- NSF Standard 42 certified (material safety).
- Performance validated by independent laboratories including WQA.
- Constantly quality and performance monitored in Filtrex Technologies' extensive in-house laboratories.

Our experienced technical team can also assist customers in achieving independent certifications of their own for products manufactured for them by Filtrex Technologies.
